Editorial

Interdisciplinary is characterized by the intensity of exchanges among experts and the degree of actual interaction of the disciplines within the same research project (Prof. Dr. Hilton Japiassu, Universidade Federal do Rio de Janeiro, UFRJ).

The **LIPH Science Journal** publishes academic and professional production, since its launch in 2014, and with pioneering, makes room for scientific debate, in Recension modality. In celebration of the first anniversary of its existence, the **LIPH Science Journal** held the International Conference Primum Non Nocere, which took place in Uberaba-MG, Brazil, at the memorable date of August 7, 2015, with the presence of Prof. Dr. Joseph William Gordon, renowned scientist from the University of Manitoba (UofM), Canada, and having as interpreter the master's student from UofM Simone Cristina da Silva Rosa, graduated at the University of Triangulo Mineiro (UFTM). At the Conference also highlighted those academics and professionals who, exclusively in English, did the exposition of their Poster Presentation.

During the international event the **LIPH Science Journal** held the Solemnity of the delivery of the “**Primum Non Nocere**” Award, chaired by Prof. Jose Valerio Lopes dos Santos, Orthodox priest in Brasilia, and a member of “Primum Non Nocere International Award Committee”.

The “**Primum Non Nocere**” Award was granted to UFTM by the hands of the highest authority of the respective institution present at the Conference, his Excellency Ombudsman Leovaldo Cassimiro, and having been protocolled at the Ombudsman System of the Federal Executive Branch, performing itself the formality of Delivery to the Magnificent Rector before University Board on September 30, 2015. In addition to paying homage to the 10 Years of existence of the UFTM. A special mention deserves the support given to the event by Dr. Claudio Julio Fontoura, for drawing the international cooperation strategies between **LIPH Science Journal** and the UofM.

I thank the presence of representatives from Universidade Federal de Uberlândia (UFU), Universidade Estadual de Campinas (UNICAMP), Faculdades Associadas de Uberaba (FAZU), UofM and the Orthodox Cathedral of Brasilia as well.

SZYMANIAK, Nazaré Pellizzetti. Editorial. Translation by: [Euripedes Humberto Borges](#). **LIPH Science**, v.3, n.1, p.127-128, Jan./Mar., 2016. www.liphscience.com

In exclusively electronic version, the **LIPH Science Journal** has original contributions and scope in interdisciplinary sciences, and having transferred the aquis in October 2015, to its own server in the USA and converted the area to www.liphscience.com

At the **LIPH Science Journal** the Reader automatically finds the academic or professional experience of each of the authors of scientific production by direct access to the link Curriculum Lattes or Research Gate.

In 2016, the reader will be able to access the **LIPH Science Journal**, on your cell “tablet” or “Smart phone”. Still, in order to speed the range of academic scientific production of publications and interdisciplinary professional in sciences, the LIPH Science journal offers translation service, textual review and / or formatting, in addition to the scientific production guidance by academics, because a scientific production makes the author a bibliographic reference.

The **LIPH Science Journal** promotes quarterly scientific production in the modalities of academic or professional article, including work of course conclusion, case study, recension, experience report, technical report, review, dissertation, thesis, poster, among others.

The idealization of the **Session “Eureka”** from the Greek and having as a meaning “discovery” is related to the scientific production of undergraduate students, originated by pressing need of the student scientific development, from the roots of the academic curriculum and reason for the existence of a university. This idea rests on traditions that accompany scientists since the time of Archimedes. My desire as a teacher and Editor of **LIPH Science Journal** is that all undergraduate students can one day cry out 'Eureka'. Feel all of you invited to participate as readers and / or authors.

Cordially,

[Nazaré Pellizzetti Szymaniak](#)
